

your search engine

on CD-Rom, Intranet and Website

Why use the Windex® search engine ?

To index documents in HTML, PDF, WORD, XML, TEXT formats contained

on CD-Rom, on Intranet,
on your Website,
on Interactive kiosk

To offer users a fast, simple search engine
Windex offers natural-language search facilities.
No computer skills are required to use the search engine.

To carry out a technology watch
Has a remote website attracted your attention?
You can index it easily for quick access to the information
it contains.

To distribute CD-Roms which can be used by all
No need for users to install and configure the software.
They can use the search engine off line directly on
the CD-Rom.

To update your documents efficiently
Use Windex to locate all the pages containing the
information to be updated.

A few examples of applications on CD-ROM :
Product catalogs, documentation (technical, legal, economic,
scientific etc), reviews of the press, encyclopedias...

Retrieve documents on CD-Rom without prior installation of the Windex software program

Windex is composed of 2 modules :

- the indexing module
- the search module

this is a Java applet located on a CD-ROM, on an intranet server or on a website.

Index your documents quickly

- Choice between indexing of a CD-Rom, a website, or an intranet server,
- Indexing of documents in HTML, PDF, WORD, XML, TEXT formats,
- Exclusion of words, URLs, files or types of documents,
- Selection of the number of words in the summary,
- Customization of the search tool (texts, messages, colors, buttons),
- Creation of search categories,
- Choice of the Boolean operators in the language of the user,
- Positioning of the results window,
- Highlighting of the target words in the document displayed (overscoring, flashing, colors...).

The easy way to retrieve and view your information

- Multilanguage searches,
- Windex can manage accents, plurals, upper and lower case
- The search is carried out in natural language in the language of the indexed document
- Windex manages phonetic searches (in French)
eg. I ask for the word "fonetic"
Windex will find all the documents containing the word "phonétique"
- Document searches by category or theme
- Searches by date, queries with proximity operator
- The target words are highlighted in the document which is displayed
- No need to know key words or query language.

Total compatibility

The Windex search engine has been developed in Java and can run on all types of platforms (Windows 9X, NT, W2000, MacOS, Linux, Unix, Psion...)

Portrait

Founded in 1999, MULTIMEDIA SOLUTIONS is a software publishing company which designs and develops products for the new Information and Communication Technologies.
